I.   Enterprise Discussion

A. Schedule of Events (SOE) Enterprise highlights, available online

❖ WCOSS:

  • Upgrade WCOSS shared storage to replace Aspera storage
    with a GPFS-based solution. Requires a 1-day outage of
    /sss followed by a multi-day period where /sss is read-only
    while the data is restored. To be implemented beginning
    on October 8 at 1200Z. Developer write access will be
    restored after the completion of this work (expected to be
    done sometime on October 10).

  • The GEFS implementation requires a 24-hr parallel
    production run followed by a WCOSS production switch.
    Implementation to begin on Tuesday October 13, with the
    WCOSS switch to Tide and the GEFS implementation
    occurring on Wednesday October 14. Dev access will be
    restricted until after the implementation is completed on
    the 14th.

  • Production switch from Tide to Gyre on Friday October 16.
